

# **SHEETROCK® MH**

## **SPEED-TEX™ Ready-Mixed Spray Texture**

---

### *Consistent performance without the mess.*

- Ready-mixed spray provides consistent, economical results—no mixing and less cleanup.
- Ideal for creating stipple, spatter knockdown or orange-peel finishes over gypsum panels.
- One-coat coverage dries quickly, in a soft-tone white finish, with less cracking or shrinking.
- Delivers excellent surface relief on interior walls and ceilings.

For more information or availability of SHEETROCK® brand MH SPEED-TEX™ ready-mixed spray texture, please contact your USG representative or visit [usg.com](http://usg.com).

*"In 30 years, I've seen a lot of products come and go but this one will be around for a long time. Once you try it, it's a no-brainer. Cost-wise, it's the right thing to do. You're going to have a more consistent product, team members can keep the mud and the spray off of themselves and there's less cleanup at the end of the day. It's an advantage that only the people in the plant would understand."*

—Wayne Davis, Production Manager, Clayton Homes, Richfield, NC

***No mixing and easy cleanup mean enhanced productivity.***

Available in 275-gal. disposable totes  
or 4.5-gal. pails.

# SEE WHAT OTHER INDUSTRY PROS ARE SAYING ABOUT SPEED-TEX™ READY-MIXED SPRAY TEXTURE

Ben Flores  
General Manager

## **SPEED-TEX is premixed to save you time.**

*"Before, we had to unbox the mud, clear the machine, add water to it to get the consistency right, then spray it, then come back with a 12 points roller and then stipple it. Now, no mixing, no rolling—just spray it and go straight to stipple. It probably saves about an hour a day."*

—Junior Martinez, Production Manager, Clayton Homes, Oxford, NC

*"It's faster, without the mixing and the cleanup that goes along with it."*

—Chip Loughlin, Materials Manager, Clayton Homes, Oxford, NC

## **SPEED-TEX can help your bottom line.**

*"Not factoring labor savings, we've seen about a 4 to 5 percent costs savings versus what we were doing before."*

—Chip Loughlin, Materials Manager, Clayton Homes, Oxford, NC

*"The pricing was in line with what we were looking for, especially given the economy."*

—Wayne Davis, Production Manager, Clayton Homes, Richfield, NC

## **SPEED-TEX is less messy, meaning faster cleanup—and fewer headaches.**

*"Adding texture can be the biggest mess in the plant. And that's one of the benefits to it. Because, at the end of the day, the guys can actually just sweep up the floor and it's clean."*

—Junior Martinez, Production Manager, Clayton Homes, Oxford, NC

*"People who are actually doing the work like it because it doesn't overspray all over them like the other product did so they don't get as dirty. And they don't have the mess to clean up at the end of the day."*

—Wayne Davis, Production Manager, Clayton Homes, Richfield, NC

## **SPEED-TEX delivers consistency.**

*"When you have team members mixing, everyone does it a little different so they weren't getting a consistent formula every time."*

—Wayne Davis, Production Manager, Clayton Homes, Richfield, NC

*"With SPEED-TEX, everything is consistent. In a modular environment, that means unit A is going to look exactly like unit B."*

—Junior Martinez, Production Manager, Clayton Homes, Oxford, NC

*"In the field, repairs sometimes wouldn't match. So they would have to do a whole room instead of just covering a crack—which compounded costs. Now, each retailer receives a bucket of premix so they can do their own repairs. They love it."*

—Ben Flores, General Manager, Clayton Homes, Oxford, NC
